

VENT HOODS & EXHAUST SYSTEMS

- Application **MUST** include two sets of shop drawings and material specifications. Drawings to be in accordance with the Mechanical Code of New York State. Drawings must detail the physical and chemical properties and hazard characteristics of the material being conveyed; the specifications of the air moving device; the construction design and type of materials used in the hood/duct work; support system and the type and location of fire dampers, fire detection and/or fire suppression equipment. A legend **MUST** be supplied on the shop drawing(s). All drawings shall be stamped, sealed and signed by a licensed Architect or Engineer.
- All shop drawings are to include a statement indicating, "This installation is in accordance with the Mechanical Code of New York State except as specifically noted on the installation drawings."
- Work shall not be started prior to the receipt of a permit/approval from the Town of Southampton Department of Fire Prevention.
- Ducts shall lead directly to point of termination. Discharge termination shall be accordance with section 506.3.13 of the Mechanical Code of New York State.
- Duct clearances shall be in accordance with section 506.3 of the Mechanical Code of New York State.
- Contact the Town Fire at the Department of Public Safety at 702-2919 with any questions or requests for deviations from above or deviations from NFPA 96.
- Installation shall not deviate from approved plans.
- Contact the Town of Southampton Department of Fire Prevention at 702-2919 at least five business days in advance to schedule appointment for final inspection.
